

Installing Jfrog Artifactory on CentOS

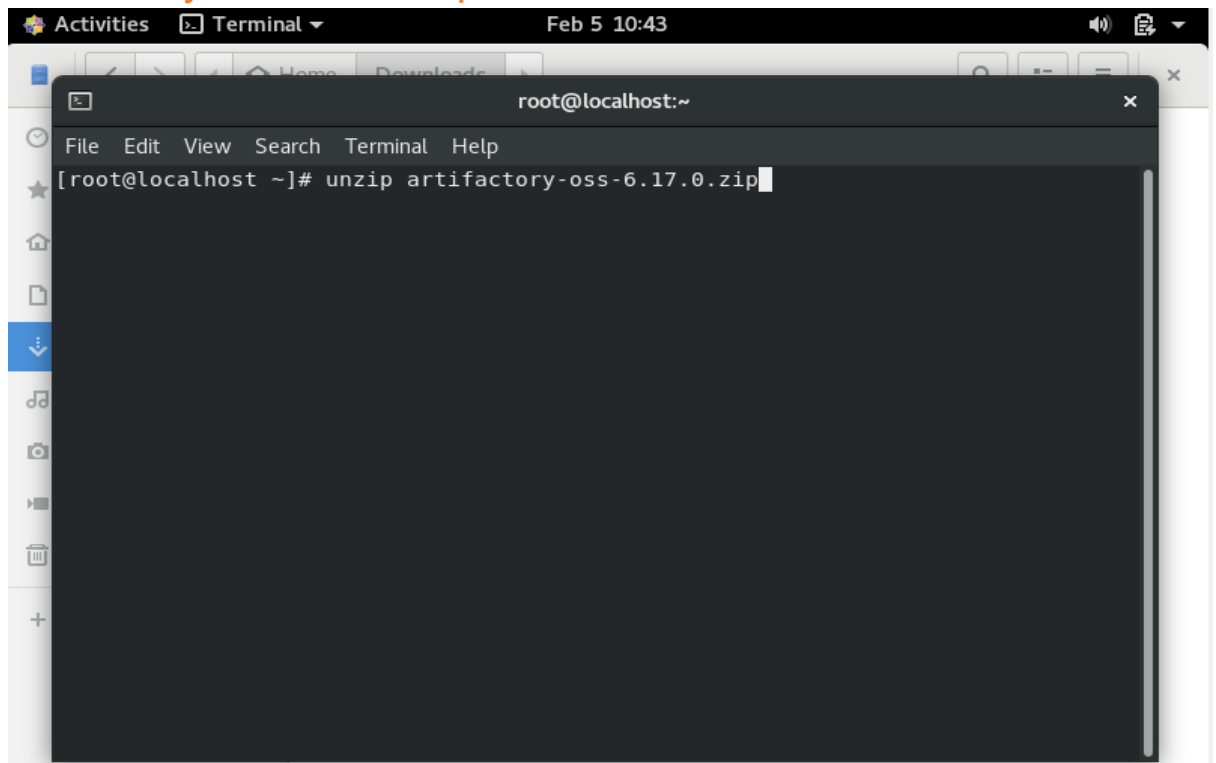

1. Go to the official website of Jfrog (<https://jfrog.com/open-source/>).
2. Click on **Download zip** for downloading Jfrog.

3. Create a directory in your centos system using **mkdir Jfrog**

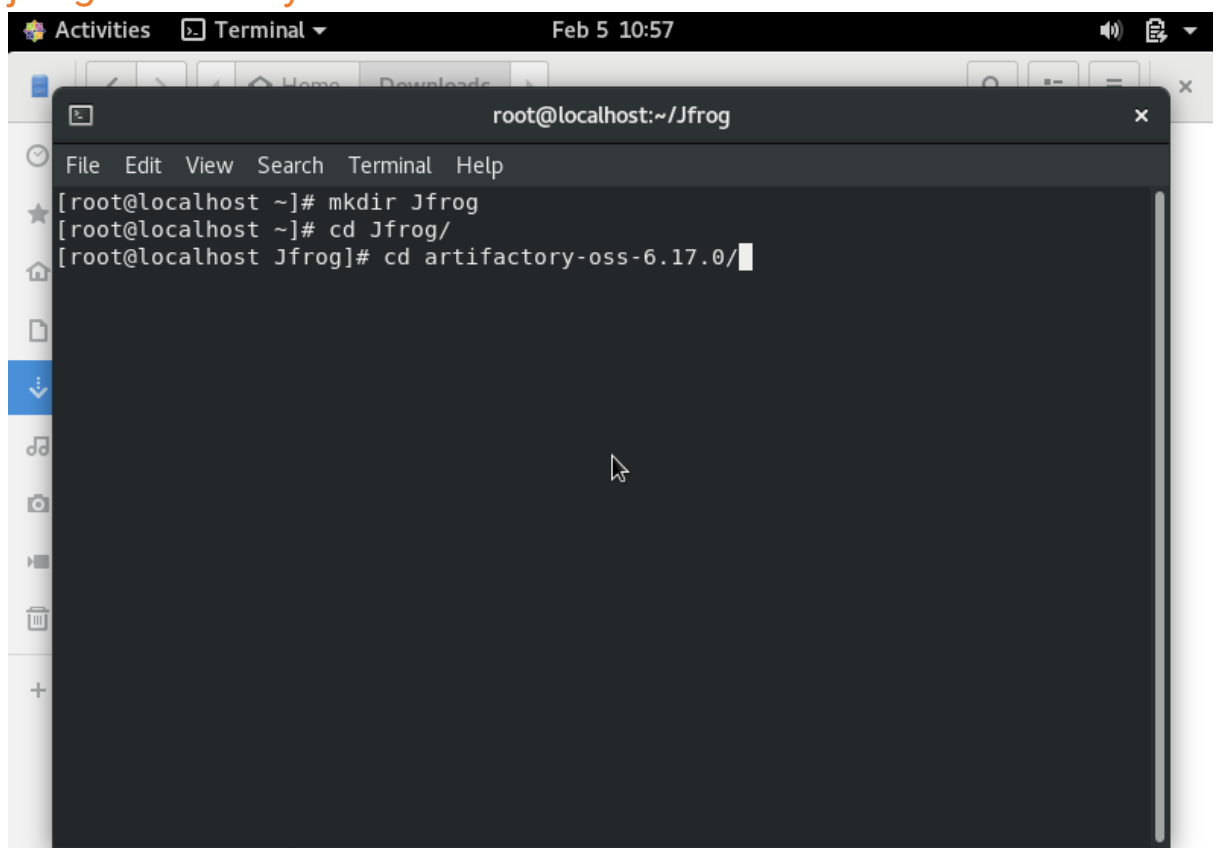

4. Unzip the zip file inside **Jfrog** directory using **unzip jfrog-artifactory-oss-6.17.0.zip**

A terminal window titled "root@localhost:~" is shown. The command `unzip artifactory-oss-6.17.0.zip` is entered at the prompt. The terminal has a menu bar with "File", "Edit", "View", "Search", "Terminal", and "Help". The background shows a desktop environment with a sidebar containing icons for Home, Downloads, and other files.

```
root@localhost:~  
File Edit View Search Terminal Help  
[root@localhost ~]# unzip artifactory-oss-6.17.0.zip
```

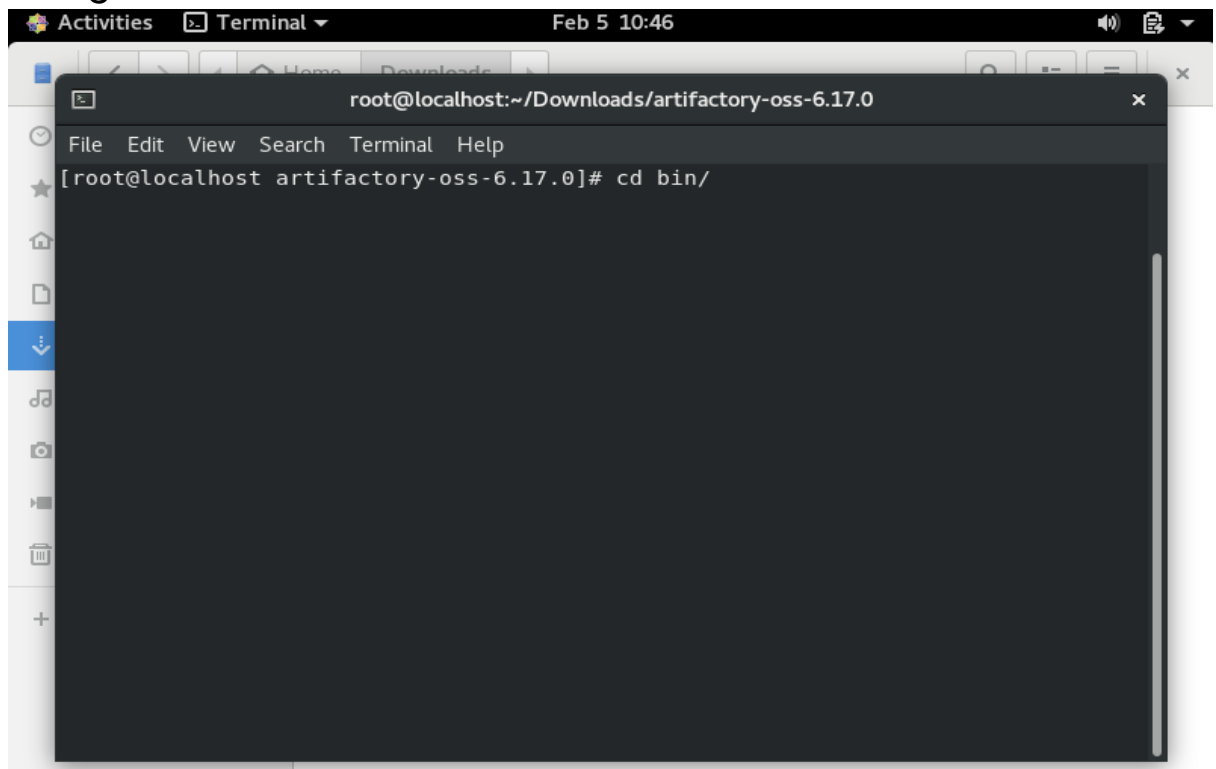

5. Go inside **jfrog-artifactory-oss-6.17.0.** directory using **cd jfrog-artifactory-oss-6.17.0.**

A terminal window titled "root@localhost:~/Jfrog" is shown. The commands `mkdir Jfrog`, `cd Jfrog/`, and `cd artifactory-oss-6.17.0/` are entered at the prompt. The terminal has a menu bar with "File", "Edit", "View", "Search", "Terminal", and "Help". The background shows a desktop environment with a sidebar containing icons for Home, Downloads, and other files.

```
root@localhost:~/Jfrog  
File Edit View Search Terminal Help  
[root@localhost ~]# mkdir Jfrog  
[root@localhost ~]# cd Jfrog/  
[root@localhost Jfrog]# cd artifactory-oss-6.17.0/
```

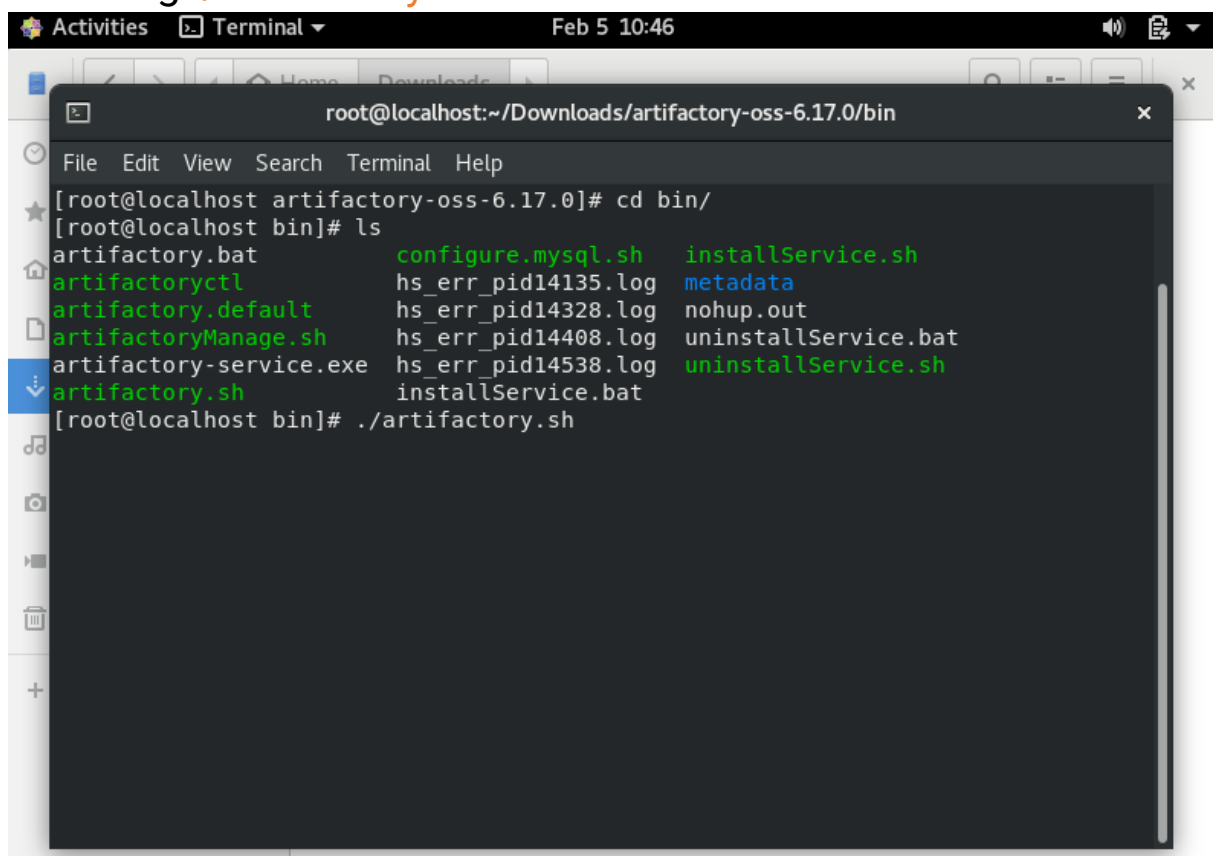

6. Go to bin directory **inside jfrog-artifactory-oss-6.17.0.**
using **cd bin**

A terminal window titled 'root@localhost:~/Downloads/artifactory-oss-6.17.0' is shown. The prompt is '[root@localhost artifactory-oss-6.17.0]#'. The command 'cd bin/' has been entered and executed, resulting in a new prompt '[root@localhost bin]#'.

```
root@localhost:~/Downloads/artifactory-oss-6.17.0
File Edit View Search Terminal Help
[root@localhost artifactory-oss-6.17.0]# cd bin/
[root@localhost bin]#
```

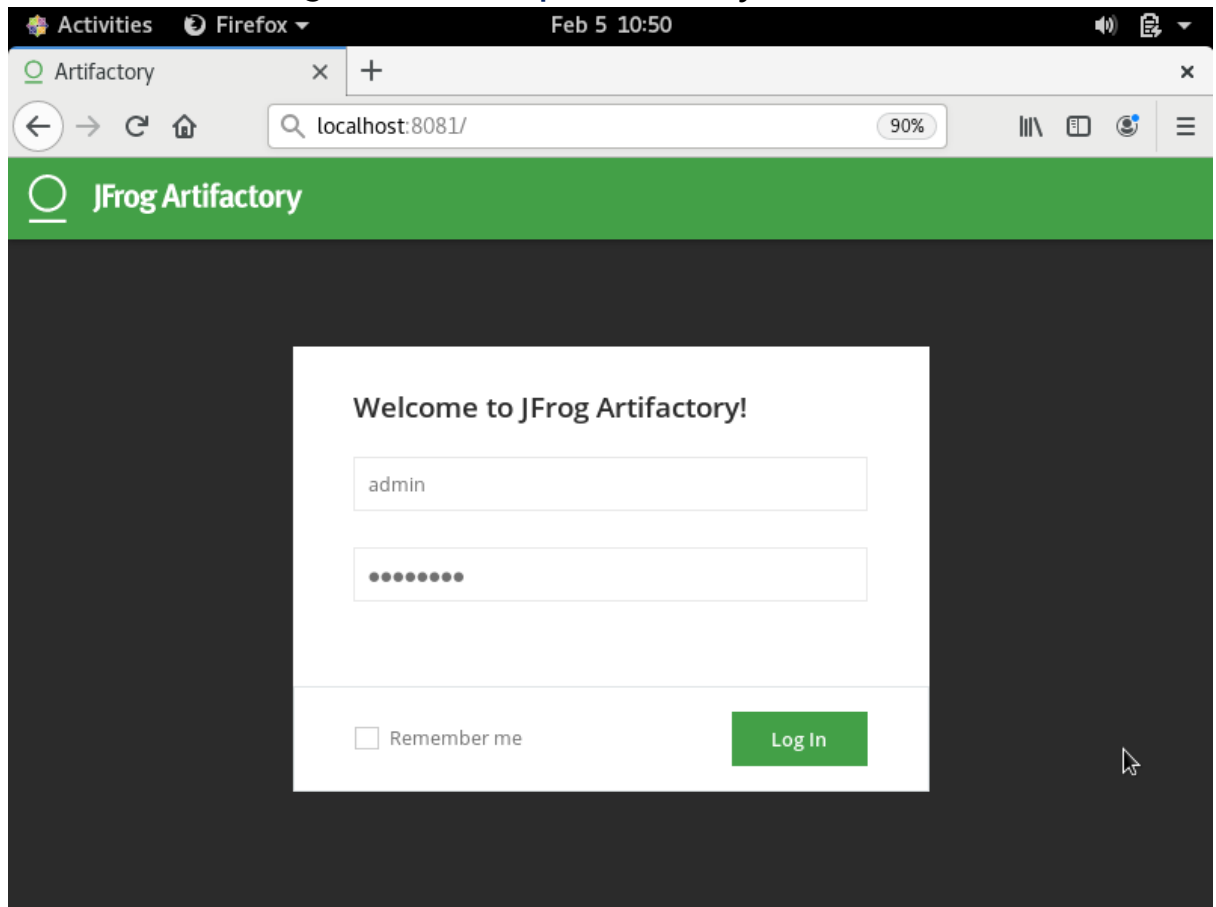

7. Inside bin directory you will find **artifactory.sh** file. Run that file using **./ artifactory.sh**

A terminal window titled 'root@localhost:~/Downloads/artifactory-oss-6.17.0/bin' is shown. The prompt is '[root@localhost bin]#'. The command 'ls' has been entered and executed, displaying a list of files and directories. The command './artifactory.sh' has been entered and executed, resulting in a new prompt '[root@localhost bin]#'.

```
root@localhost:~/Downloads/artifactory-oss-6.17.0/bin
File Edit View Search Terminal Help
[root@localhost artifactory-oss-6.17.0]# cd bin/
[root@localhost bin]# ls
artifactory.bat          configure.mysql.sh       installService.sh
artifactoryctl           hs_err_pid14135.log     metadata
artifactory.default      hs_err_pid14328.log     nohup.out
artifactoryManage.sh     hs_err_pid14408.log     uninstallService.bat
artifactory-service.exe  hs_err_pid14538.log     uninstallService.sh
artifactory.sh           installService.bat
[root@localhost bin]# ./artifactory.sh
[root@localhost bin]#
```

8. Once you will successfully run that you can open dashboard using [localhost/ip:8081](http://localhost:8081) on your browser.

9. If it asks for Username and password then put default id and password i.e. Username-[admin](#) Password-[password](#). Now your successfully login to Jfrog.
