

1. Open your Browser
2. Go to official website of git(<https://git-scm.com/downloads>)

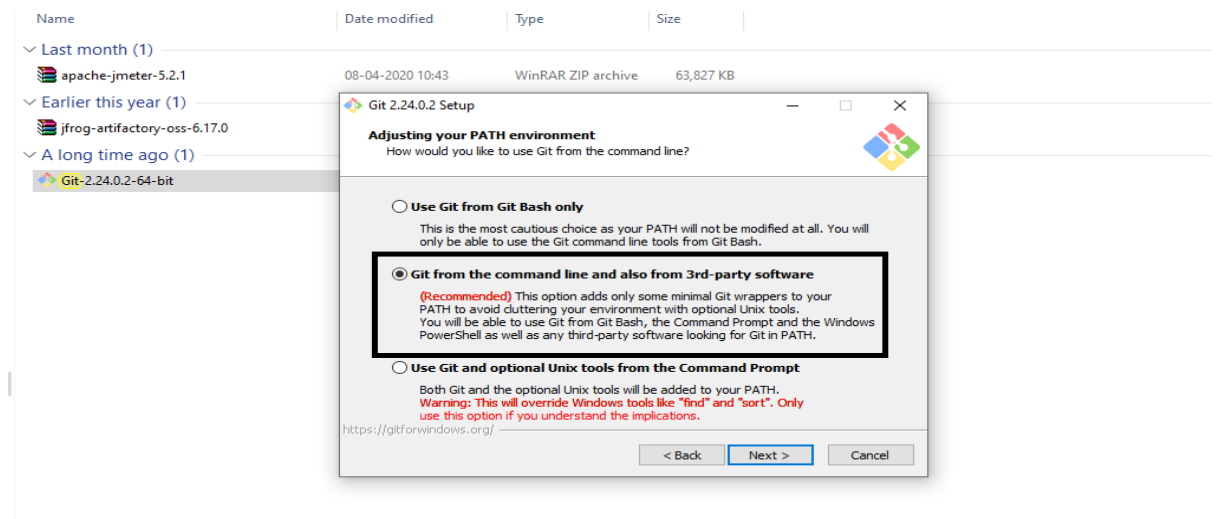

3. Select windows under download section. Your downloading will start automatically.

4. Once your download will complete open the .exe file and click on it.

jfrog-artifactory-oss-6.17.0	05-02-2020 10:26	WinRAR ZIP archive	1,68,576 KB
A long time ago (1)			
Git-2.24.0.2-64-bit	10-12-2019 09:57	Application	46,859 KB

5. Click next 3 times and then under **adjusting your path variable** tab select the second option i.e. **git from the command line and also from 3rd-party software** so you can use git from command line as well as from git bash and other software.

6. Keep rest of the setting as default and at last click on install tab to begin your installation.
7. Once your installation is complete you can verify it by going to your command line and firing the command `git --version`. You will get something like given below.

The image shows a Windows Command Prompt window titled 'C:\Windows\System32\cmd.exe'. The prompt displays the following text: 'Microsoft Windows [Version 10.0.18362.535] (c) 2019 Microsoft Corporation. All rights reserved. C:\WINDOWS\System32>git --version git version 2.24.0.windows.2 C:\WINDOWS\System32>'. The command 'git --version' has been executed, and the output 'git version 2.24.0.windows.2' is displayed on the next line.

8. That is it your Installation is successful.
